

Audit Shield claims activity across Australia

1 July 2024 to 30 June 2025

The Australian Taxation Office (ATO) continues to sharpen its compliance activities through targeted campaigns backed by advanced data-matching systems and artificial intelligence. These tools enable the ATO and other government revenue authorities to detect anomalies and focus on specific industries, behaviours, and claim patterns with increasing speed and accuracy. As compliance scrutiny intensifies, businesses, SMSFs, and individuals all remain at risk of being reviewed or audited.

The chart below illustrates Audit Shield service claims lodged across Australia between 1 July 2024 to 30 June 2025, based on data compiled by Accountancy Insurance*.
